About Conference

The **ICCECIP 2021 -3rd International Conference on Central European Critical Infrastructure Protection** will be held this year as part of the Hungarian Science Festival in online form. **The development of cyber technologies and digitalization all around our daily life imply new security challenges in critical infrastructure protection and security science.**

The highlight new experience, research and solution results reached in the last years are a to everyone. The new motto of this year's conference is **"Kinetic and cyber tools in the critical infrastructure protection"**. A key goal is to show the unity of our region and giving space for all researchers around the World, experienced and young researchers, PhD students to share their latest results with each other and the public.

The common historical and cultural past of the region, as well as the common development path of the last centuries also the continuous cooperation also connect our countries and lay the foundations for future common goals.

The **ICCECIP 2021** also serves to foster communication among researchers and engineers working in a wide variety of scientific areas with a common interest.

The meeting will provide an opportunity to highlight recent developments and to identify emerging and future areas of growth in this exciting field. Also, the conference program includes **online oral presentations and poster sessions** from scientists working in similar areas to establish a platform for collaborative research projects in this field.

The Committee of **ICCECIP 2021** continues to make an effort to hold **ICCECIP 2021** conference successfully by working with the best editor and reviewer teams.
